

Bulk & Container

North Sea Handling is an international company focusing on providing the maritime industry with market-leading solutions within equipment for cargo/passenger access and energy efficiency. Innovation and long-term-philosophy are keywords in our everyday work.

NORTH SEA HANDLING

NORTH SEA HANDLING

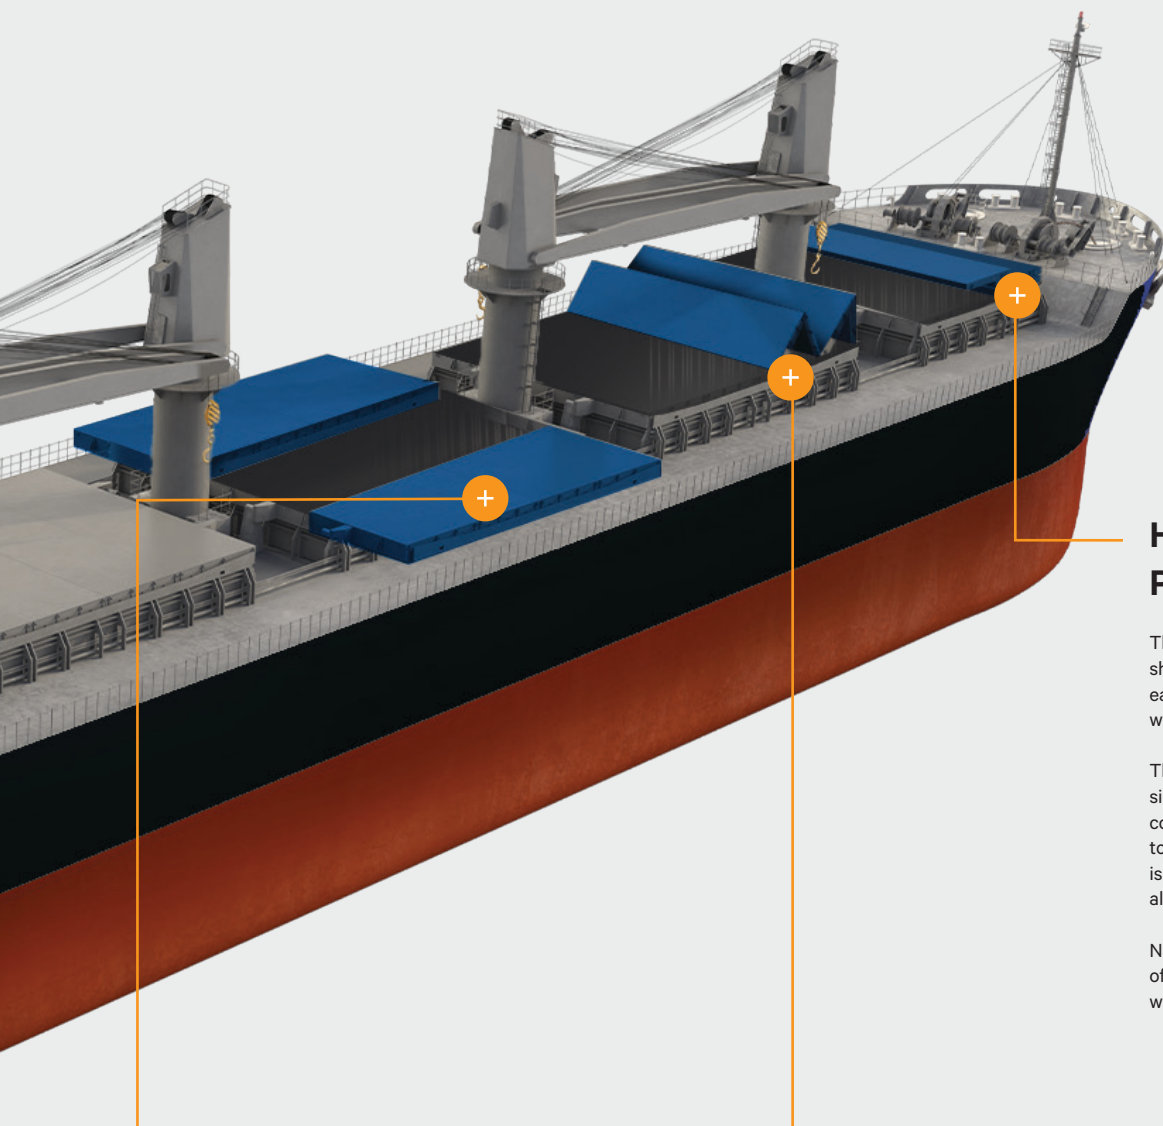

Hatch Cover Lift On/Off Type

There can be several of deck openings in a ship, serving different purposes but where each opening might pose a threat to the water and fire integrity.

The Lift On/Off Type Hatch Covers are usually operated by some kind of lifting gear onboard the vessel and stacked either onboard or ashore.

NSH Ships Equipment delivers a wide range of different hatch covers tailor made to suit with the ship and its operation conditions.

Hatch Cover Piggy-back Type

There can be several of deck openings in a ship, serving different purposes but where each opening might pose a threat to the water and fire integrity.

The Piggy-back Type Hatch Covers are similar to the Side Rolling Type but where covers can be stacked on top of each other to reduce stowage space. This operation is usually managed by hydraulic cylinders allowing for the vertical movement.

NSH Ships Equipment delivers a wide range of different hatch covers tailor made to suit with the ship and its operation conditions.

Hatch Cover Side-rolling Type

There can be several of deck openings in a ship, serving different purposes but where each opening might pose a threat to the water and fire integrity.

The Side-rolling Type Hatch Covers are usually operated by either a drive chain or by a rack/pinion solution. They are usually stacked in horizontal position.

NSH Ships Equipment delivers a wide range of different hatch covers tailor made to suit with the ship and its operation conditions.

Hatch Cover Folding/MF Type

There can be several of deck openings in a ship, serving different purposes but where each opening might pose a threat to the water and fire integrity.

The Folding Type Hatch Covers can be operated either by some kind of lifting gear or with folding devices onboard the vessel. They are usually stacked in vertical position.

NSH Ships Equipment delivers a wide range of different hatch covers tailor made to suit with the ship and its operation conditions.
